

Vasudev Caandalvadi (Vasu)

Head of Delivery - Private Sector & GDCs, Eviden

I have an overall work experience of around 27 years of which 22 + has been in the Syntel and now Atos, Eviden family.

My formative working years were shaped in the construction industry where I performed project site lead & planning roles. At Atos, I've held technical, business & IT leadership roles within the organization for customers across Europe & Americas and have lived across multiple states in India & Americas. Started as a Java developer so am technical and have spent lot of time in client engagement, delivery leadership especially setting up integrated delivery teams for global clients. A major part of my career has been servicing customers across the Insurance Domain. Working with some of the key players in the industry – both from a solutioning and client partnering role, have provided me with a deep insight on the insurance domain and the needs around technology.

I like to challenge myself and have evolved across the years to take up several leadership roles across the company, including Workforce Management for the global organization, leading transformation across various stages of the organization's journey. My current role is Head of Delivery - Private Sector & GDCs while continuing to contribute towards global delivery transformation initiatives.

I live with my family in Pune, India with my wife, father and daughter who moved out earlier to study college. I continue learning extensively, having completed my executive education from IIM-B in 2015 and currently pursuing a leadership and strategy program with HEC Paris.
